

IBM Research is looking for researchers and software engineers (graduates and experienced) to join our Cloud teams in Haifa or Tel Aviv.

Our cutting-edge cloud projects involve open source technologies such as OpenStack, Spark, Docker, Mesos, Kafka, Secor, CouchDB, Blockchain, CloudFoundry, Spring, and more.

Join us to help create advanced features for IBM Cloud IaaS and PaaS in the areas of

- High availability and fault tolerance
- Large-scale distributed systems
- Cloud storage and security

We are looking for candidates with demonstrated research abilities and good hands-on systems skills in one or more of the following areas: data center networking, distributed storage, resource management, DevOps.
