

Connect. Accelerate. Outperform.™

Mellanox is looking for an Electrical or Computer Student/Engineer to join the DFT (Design for Test) team, as part of the backend group. The position includes definition, design, verification and post-silicon activation of DFT features, and requires working closely with a wide variety of Mellanox groups - backend, chip design, verification, QA and production testing. Working on the most advanced technologies, Mellanox backend team has been confronting interesting and complex challenges, and has taped-out many devices with unmatched quality and great success.

- **Education:** Student/ B.Sc. in Electrical or Computer engineering.
