## Software Engineer Student for Azure Cyber Security Team

Location: Herzeliya

We are seeking for top-notch talent with security background, who are passionate about security and cloud technologies. If you are obsessed about solving complex problems, and would like to join a team with ambitious goals that aim to protect Microsoft's Azure customers - than we are the place for you!

### Background

The Security and Identity group accountable for the development cutting-edge security technologies and contributes to Microsoft's major products and cloud offerings that account for \$B in revenue. In cloud platform like Azure, Security is going to be a major differentiator and we own the mission of articulating the security strategy and driving the execution that maximize this potential.

Our customers are ripping the benefits of the cloud by using the Azure platform to process and store their precious data at scale. A mandatory predicate for the success of this business is to ensure that Azure is both secure and trusted.

Our mission is to develop the Azure Analytical Thread Detection Engine, a security solution that assigns a risk score to activities in azure. This solution is based on state of the art machine learning techniques aggregating TBs of information each day.

### Required skills:

- Student for B.Sc./M.Sc. degree in Computer Science or a related technical discipline, 4th semester or above
- GPA 85 and above
- Experience and Passion around software engineering and code - C/C++/C# experience preferred

## Software Engineer Student for Mobile BI team

Location: Haifa/Herzeliya

This job is an opportunity to work on a new and exciting service that Microsoft is betting on, be part of a vibrant team, and get proficient in the world of apps and services.

Business Intelligence is one of the fastest growing segments of the software industry today and it holds fascinating technological challenges of creating fast and rich ways to analyze huge masses of data. With the ever growing reach mobile clients people have both at work and at home - providing BI capabilities on mobile platforms is a natural next step attempted these days by large and small BI vendors alike. Microsoft is a leading player in the BI market both in terms of market share as well as in thought leadership and BI is a key investment for Microsoft.

In the Mobile BI team we're developing the next generation BI solutions for mobile platforms. These will provide cool and rich new ways to analyze, visualize, and consume large amounts of data. We're looking for smart and motivated software engineering students with an appetite for interesting software problems and with passion for building products that customers love.

Responsibilities include:

Design and build a Mobile Application for our powerBI offering. Target various platforms such as Windows, iOS, Android.

Take an active part in a fast moving team focused on building robust and innovative software.

Work closely with experienced engineers and be part of an agile and fast moving development team.

Required skills:

- 2nd+ year in Computer Science or Software engineering.
- Specific knowledge and expertise in Mobile development and/or BI technologies is a plus.
- Specific knowledge in OOP and in JS/CSS/Angular or C#/XAML technologies is a plus

## Software Engineer Student for DB5

Location: Haifa

Do you want to be a part of a brand new team? Do you want to be part of small and excellent team that builds a product for millions of people?

Come and join the DB5 team and help us establish our new cloud service!

With the expedited growth of data and the popularity of our enterprise data platforms, comes a growing need to properly protect customers using our platforms to power their critical businesses and ensuring we have the most reliable and trustworthy data platforms in the world.

We are looking to address this need by concentrating the security efforts under one team, gain deep domain expertise and talent around data security and bake the needed features and knowledge.

We are looking for individuals with strong leadership, technical, innovative and development skills that are self-driven and can balance creativity and drive results with customer focus, team-work and the ability to quickly understand and pick up new technologies & applications.

Required skills:

- Student for B.Sc./M.Sc. degree in Computer Science or a related technical discipline, 4th semester or above
- GPA 85 and above
- Passion around software engineering and code - C++/C# experience preferred

## Software Engineer Student for Windows Azure Security

Location: Herzeliya

We are seeking for top-notch talent with security background, who are passionate about security and cloud technologies. If you are obsessed about solving complex problems, and would like to join a team with ambitious goals that aim to protect Microsoft's Azure customers - than we are the place for you!

The Security and Identity group accountable for the development cutting-edge security technologies and contributes to Microsoft's major products and cloud offerings that account for \$B in revenue. In cloud platform like Azure, Security is going to be a major differentiator and we own the mission of articulating the security strategy and driving the execution that maximize this potential.

Our customers are ripping the benefits of the cloud by using the Azure platform to process and store their precious data at scale. A mandatory predicate for the success of this business is to ensure that Azure is both secure and trusted. Additionally, our customers are seeking for advanced security technologies that will enable them to protect their core assets and detect any emerging threats while removing any barriers or add complexities to their ever-growing infrastructure needs.

Our mission is to develop the next generation security solution that will enable our customers to apply advanced security technologies in protecting their assets. This solution will be based on a smart and dynamic approach that marries between holistic and contextual paradigm and advanced capabilities built based on years of expertise in the security domain.

Required skills:

- Student for B.Sc./M.Sc. degree in Computer Science or a related technical discipline, 4th semester or above
- GPA 85 and above
- Experience and Passion around software engineering and code - C/C++/C# experience preferred
