First driverless trains and now driverless cars. It may be only a prototype but in France it has become a reality. -

Video ▶ hi-tech

Catch a wave and your sitting on top of not only the real but also the virtual world. All those tired puns about surfing the web are becoming a reality thanks to the Wireless Technology Surfboard

Video ▶ hi-tech

Someone's looking at you...in your face, into your eyes, at your fingertips ; the Biometric forum comes to keep you safe in Le Mag.

Video ▶ hi-tech

A new pollution-beating taxi that is cheaper to run than conventional versions is the subject of this edition of Hi-Tech.

Video ▶ hi-tech

Treading softly to better study the sea ; this Hi-Tech looks at a new silent study ship looking at whales. It dispenses with sonar to look deep underwater, without disturbing marine life.

Video ▶ hi-tech

This edition of Hi-Tech brings us a progress report from the Spitzer space telescope, which has made some remarkable discoveries.
