Curriculum Vitae (Shortened Version)

IGAL SASON

Last update: July 7, 2024.

PERSONAL DETAILS

Full name:	Igal Sason
Nationality:	Israeli
Birth:	May 1969, Haifa, Israel.
Marital status:	Married + 2.
Work Address:	Viterbi Faculty of Electrical and Computer Engineering (ECE), Technion-Israel Institute of Technology, Haifa 3200003, Israel.
E-mail Address:	eeigal@technion.ac.il
ORCID ID:	https://orcid.org/0000-0001-5681-1273
Website:	https://webee.technion.ac.il/people/sason
CRIS Overview	https://cris.technion.ac.il/en/persons/igal-sason

ACADEMIC DEGREES

Ph.D., 2001:	Department of Electrical and Computer (ECE) Engineering, Technion, Israel.
M.Sc., 1999:	ECE Department, Technion, Israel (direct Ph.D. track).
B.Sc., 1992:	ECE Department, Technion, Israel (cum laude).

ACADEMIC APPOINTMENTS

10/2021–present	Professor, secondary affiliation at the Faculty of Mathematics, Technion, Haifa, Israel.
10/2017–present	Professor, Andrew and Erna Viterbi Faculty of Electrical and Computer Engineering (ECE), Technion, Haifa, Israel.
4/2009–9/2017	Associate Professor (with tenure), ECE Department, Technion, Haifa, Israel.
10/2003–3/2009	Senior Lecturer, ECE Department, Technion, Haifa, Israel.
10/2001–9/2003	Scientific Collaborator (post-doc), School of Computer and Communication Sciences, Ecole Polytechnique Fédérale de Lausanne (EPFL), Lausanne, Switzerland.
3/1998–9/2001	M.Sc. and Ph.D. student (direct track to PhD) at the ECE Department, Technion, Haifa, Israel.

RESEARCH INTERESTS

Mathematical foundations of information theory, and graph theory, including:

- Shannon theory and information measures: mathematical foundations with applications to statistical inference, guessing, and coding.

- Zero-error information theory and extremal combinatorics.

- Graph invariants, graph products, spectral graph theory, and their connections to information theory.

- Concentration-of-measure inequalities in information theory, and applications.

- Coding theory: codes on graphs, distance spectra and performance bounds of codes and code ensembles, and tradeoffs between performance and complexity.

EDITORIAL ACTIVITIES IN PEER-REVIEWED JOURNALS

1. *Editor-in-Chief of the IEEE Transactions on Information Theory* (1.1.2020 – 30.6.2021).

2. *Executive Editor of the IEEE Transactions on Information Theory* (1.7.2018 – 31.12.2019).

3. *Associate Editor At Large of the IEEE Transactions on Information Theory* (1.5.2014 – 31.12.2017).

4. *Associate Editor for Coding Theory of the IEEE Transactions on Information Theory* (1.2.2008 – 1.2.2011).

5. *Guest Editor for the AIMS Mathematics journal* (AIMS Press) of a special issue entitled *Mathematical Foundations of Information Theory* (1.7.2023 - 31.12.2024).

6. *Guest Editor of the Entropy journal* (MDPI) for the following special issues:

   (a) Extremal and Additive Combinatorial Aspects in Information Theory (1.6.2022 – 31.8.2024).
   (b) Divergence Measures: Mathematical Foundations and Their Applications in Information-Theoretic and Statistical Problems (1.7.2019 – 1.6.2021).
   (c) Probabilistic Methods in Information Theory, Hypothesis Testing, and Coding (1.5.2018 – 30.6.2019).

RECENT ACADEMIC HONORS

1. *IEEE Fellow of the Information Theory Society*, effective from January 2019.

2. *Fellow of the Institute of Combinatorics and its Applications (ICA)*, effective from January 2024.

LIST OF SCIENTIFIC PUBLICATIONS

Book:

M. Raginsky and I. Sason, *Concentration of Measure Inequalities in Information Theory, Communications and Coding: Third Edition*, (261 pages, ISBN: 978-1-68083-534-2), *Foundations and Trends in Communications and Information Theory*, NOW Publishers, Delft, Netherlands, 2019.

Edited Book:

Divergence Measures: Mathematical Foundations & Applications in Information-Theoretic and Statistical Problems, (256 pages, ISBN: 978-3-0365-4332-1), edited by I. Sason, *Entropy*, MDPI, Basel, Switzerland, 2022.

Published Peer-Reviewed Journal Papers

1. I. Sason and S. Shamai, "Bounds on the error probability for block and turbo-block codes," *Annals of Telecommunications*, vol. 54, no. 3–4, pp. 183–200, March–April 1999.

2. M. Peleg, I. Sason, S. Shamai and A. Elia, "On interleaved, differentially encoded convolutional codes," *IEEE Transactions on Information Theory*, vol. 45, no. 7, pp. 2572–2582, November 1999.

3. I. Sason and S. Shamai, "Improved upper bounds on the ML decoding error probability of parallel and serial concatenated turbo codes via their ensemble distance spectrum," *IEEE Transactions on Information Theory*, vol. 46, no. 1, pp. 24–47, January 2000.

4. I. Sason and S. Shamai, "Improved upper bounds on the ensemble performance of ML decoded low-density parity-check codes," *IEEE Communications Letters*, vol. 4, no. 3, pp. 89–91, March 2000.

5. I. Sason and S. Shamai, "On union bounds for random serially concatenated turbo codes with maximum likelihood decoding," *European Transactions on Telecommunications* (ETT), vol. 11, no. 3, pp. 271–282, May–June 2000.

6. I. Sason and S. Shamai, "On improved bounds on the decoding error probability of block codes over interleaved fading channels, with applications to turbo-like codes," *IEEE Transactions on Information Theory*, vol. 47, no. 6, pp. 2275–2299, September 2001.

7. S. Shamai and I. Sason, "Variations on Gallager bounds with some applications," *Physica A: Statistical Mechanics and Its Applications*, Elsevier Science, vol. 302, no. 1-4, pp. 22-34, December 2001.

8. S. Shamai and I. Sason, "Variations on the Gallager bounds, connections, and applications," *IEEE Transactions on Information Theory*, vol. 48, pp. 3029–3051, December 2002. (This paper was awarded the *2003 IEEE Information Theory Society and IEEE Communications Society joint paper award*).

9. I. Sason, E. Telatar and R. Urbanke, "On the asymptotic input-output weight distributions and thresholds of convolutional and turbo-like encoders," *IEEE Transactions on Information Theory*, vol. 48, no. 12, pp. 3052–3061, December 2002.

10. I. Sason and R. Urbanke, "Parity-check density versus performance of binary linear block codes over memoryless symmetric channels," *IEEE Transactions on Information Theory*, vol. 49, no. 7, pp. 1611–1635, July 2003.

11. I. Sason, S. Shamai and D. Divsalar, "Tight exponential upper bounds on the ML decoding error probability of block codes over fully interleaved fading channels," *IEEE Transactions on Communications*, vol. 51, no. 8, pp. 1296–1305, August 2003.

12. I. Sason and R. Urbanke, "Complexity versus performance of capacity-achieving irregular repeat-accumulate codes on the erasure channel," *IEEE Transactions on Information Theory*, vol. 50, no. 6, pp. 1247–1256, June 2004.

13. I. Sason, "On achievable rate regions for the Gaussian interference channel," *IEEE Transactions on Information Theory*, vol. 50, no. 6, pp. 1345–1356, June 2004.

14. H. D. Pfister, I. Sason and R. Urbanke, "Capacity-achieving ensembles for the binary erasure channel with bounded complexity," *IEEE Transactions on Information Theory*, vol. 51, no. 7, pp. 2352–2379, July 2005.

15. I. Sason and S. Shamai, "Performance analysis of linear codes under maximum-likelihood decoding: A Tutorial," *Foundations and Trends in Communications and Information Theory*, vol. 3, no. 1–2, pp. 1–222, July 2006.

16. G. Wiechman and I. Sason, "Parity-check density versus performance of binary linear block codes: New bounds and applications," *IEEE Transactions on Information Theory*, vol. 53, no. 2, pp. 550–579, February 2007.

17. I. Sason and G. Wiechman, "On achievable rates and complexity of LDPC codes over parallel channels: Bounds and applications," *IEEE Transactions on Information Theory*, vol. 53, no. 2, pp. 580–598, February 2007.

18. M. Twitto and I. Sason, "On the error exponents of some improved tangential-sphere bounds," *IEEE Transactions on Information Theory*, vol. 53, no. 3, pp. 1196–1210, March 2007.
